PROJECTS

QuickBite - Food Management System

Teach Stack: Vite+React, ExpressJs, NodeJS, MongoDB, Stripe Payment

QuickBite is a fully responsive web-based food management system designed to simplify online food ordering and management.

Care2gether - A place to connect

Teach Stack - MERN (MongoDB, Express, React, Node.js), Tailwind CSS, OpenStreetMap API, and a custom ML clustering module.

A mental health support platform where patients complete a PHQ-9 based questionnaire to be grouped using a simulated k-means model and access personalized, location-based events. Integrated secure role-based authentication and real-time event registration with a responsive dashboard.

DocuMate – Real Time Doc Editor

Teach Stack – NextJs, TipTap extensions, Typescript, LiveBlocks, Convex, Tailwind CSS.

Designed for seamless collaboration, DocuMate allows multiple users to edit documents simultaneously with instant updates and smooth user experience.
